

Advanced Summer School in Solar Physics 2008

Queen's University Belfast
31st August–5th September 2008

A programme of 16 lectures covering observational and theoretical solar physics, with specialist speakers from throughout the UK community.

Both PhD students and PDRAs will find this a valuable opportunity to gain a firm understanding of the latest work in their field.

STFC will cover registration fees for a limited number of PhD students
See website for details.
